

Priority concerns	Species/life stage impacted	Conservation Activity	Species/Life stages targeted by conservation	Threat targeted by conservation (if not directly offshore wind related)	New/ongoing projects that fulfill this need
Description of the specific impact to the system/receptor; timing of potential impact (construction/operation/decommissioning)	Specific species and age affected	Actions that offset realized losses to the impacted system/receptor. These may be activities that limit impacts from other sources	The specific species and age targeted through proposed conservation activity	If conservation does not directly address an impact from offshore wind, what threat is being addressed in compensation to ensure 'no net loss'	Projects (proposed or ongoing) that fulfill the conservation activity to offset potential take.
Turtle fishing gear entanglement	Juvenile/adults	<ul style="list-style-type: none"> <li>• Turtle safe fishing gear</li> <li>• Nest protection</li> </ul>	<ul style="list-style-type: none"> <li>• Juveniles/adults</li> <li>• hatchlings</li> </ul>		
Eagle collision	Adult/juvenile	<ul style="list-style-type: none"> <li>• Roadkill removal</li> <li>• Alternative ammo education</li> </ul>	<ul style="list-style-type: none"> <li>• Adults/juveniles</li> <li>• Adults/juveniles</li> </ul>		

# Potential Partners Roles & Mechanisms

## *Discussion Questions*

- Concerns & challenges in using compensatory mitigation to address impacts?
- **What mechanisms exist for developing a compensatory mitigation plan?** Fed and/or State agencies (via which authorities?); Stakeholder/industry groups (voluntary?)
- **How to structure a mitigation bank, or in lieu fee program?** Who would manage (Fed & State agencies? Regional Cooperative? NGO?)

# Next Steps

ATLANTIC MARINE BIRD  
COOPERATIVE

- **Many more topics to address, e.g.s:**

- VALUATION: How to translate bird impacts into compensatory actions? Risk models?
- CUMULATIVE IMPACTS: How can actions address, when permitting at site scales?
- DISPLACEMENT/HABITAT LOSS: How to account for these impacts?

- **Recommendations for planning**

- MSP WG intends to develop recommended considerations, components, alternatives, & examples to inform future planning
